

LEAVING NO STONE UNTURNED FOR NATIONAL RECONSTRUCTION

(NOV 2015 - AUG 2016)

HERD International collaborated with National Planning Commission (NPC), Ministry of Federal Affairs and Local Development (MoFALD), Ministry of Urban Development (MoUD), Central Bureau of Statistics (CBS), The World Bank, United Nations Office for Project Services (UNOPS) and Kathmandu Living Labs (KLL) to implement a National Housing Reconstruction Programme (NHRP) from December, 2015. NHRP conducted a comprehensive assessment of all households in the districts highly affected by the earthquake in order to identify the extent of damage to the households using uniform engineering criteria. The outcome of this assessment would be a robust database to inform reconstruction programme of the Government of Nepal ultimately enhancing the capacity of the government to quickly respond to future disasters through risk reduction efforts and support long-term social protection efforts. In simple terms, this programme is a follow-up validation survey to the Post Disaster Needs Assessment (PDNA) study conducted by NPC.

OUR INVOLVEMENT

HERD was responsible for implementing three major project components:

1. Recruitment of Human Resources (About 1700 Surveyors with Civil Engineering background or similar)
2. Training Management for surveyors and social mobilizers. Major processes involved were:
 - identify appropriate training venue and manage the training event (technical facilitation of the training was conducted by respective government authorities)
 - handing over the trained surveyors to the government authorities
3. Logistics Management for surveyors and social mobilizers for provision of survey kits
 - receive, store and package survey logistics (kits) as per the list provided by UNOPS;
 - distribute survey kits to surveyors and social mobilizers;
 - recollect survey kits from the surveyors
