#### Maternal Mortality Ratio by local levels

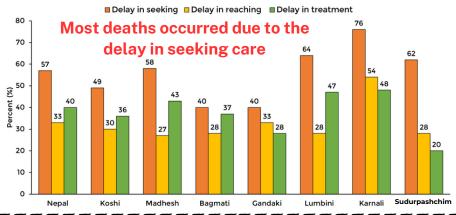

Among the 753 local levels, 381 (50.6%) did not have any maternal mortality, and 172 (22.8%) local levels had 280 or more maternal mortality ratio per 100,000 live births.

To meet the SDG target, prompt interventions are essential, particularly at the local level, especially in areas with higher Maternal Mortality Ratios (MMR), such as 128 rural municipalities and 44 municipalities with an MMR

■ 280+ exceeding 280.

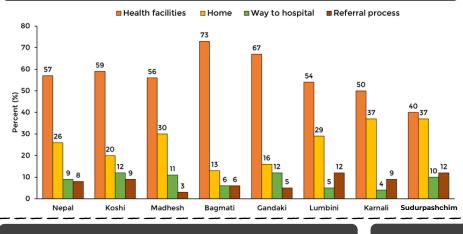

### Three delays contributing to maternal mortality

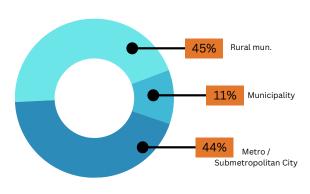

# Maternal deaths by education 0 10 20 30 No education/dont know Secondary education Basic level education Higher education 6

Most deaths occurred among women without proper education
